Announcing — **Viola Radio**

We take great pleasure in offering one of the best Violas developed in this country. The color is an exquisite shade of orchid-lavender—almost the counterpart of the famous V. Maggie Mott. Unusually fragrant, it blooms freely and continuously from May to September. The flowers are very large and the plants are endowed with a robust constitution.

We hail this exquisite novelty and are confident that it will be accepted as one of the most dependable and lovely additions to the border.

Our available stock is limited and orders will be filled in strict rotation. We urge you to reserve stock at once.

VIOLA RADIO (plants from seed) \$5.00 per dozen
